

1. Product Description

Stenkim® Koruyucu Yağ is a colorless, adipate-based protective oil. It prevents resin residues remaining in the lines of application machines from curing and clogging the lines.

2. Uses

Stenkim® Koruyucu Yağ is used in application machines running **StenSeal® 2PT 210 MU** and similar products. If the machine is to stand idle for more than a few days, the lines are filled with this product to protect them.

3. Application

After application, the machine lines are cleaned and filled with **Stenkim® Koruyucu Yağ**. Before the machine is used again, the oil in the lines is drained and the lines are flushed with the application material.

4. Safety

Applicators and supervisors must read the Safety Data Sheet (SDS) carefully and follow the instructions provided. Emptied packages must be disposed of in compliance with relevant regulations and laws.

5. Storage

Storage temperature must be between 5 and 30 °C. Packages must not be exposed to direct sunlight.

6. Disclaimer

This document is provided for general information and is based on **Stenkim®**'s laboratory data and field experience at the time of publication. **Stenkim®** reserves the right to revise this information without prior notice.

Stenkim® warrants that its products conform to the stated specifications on delivery. The buyer is responsible for determining the product's suitability for the intended purpose and for all conditions of transport, storage, application, and use. **Stenkim®** accepts no liability for results obtained under conditions outside its control. **Stenkim®**'s liability under this warranty is limited to replacement of non-conforming product and excludes any consequential or indirect damages.
